ACTIVE TRANSPORTATION ALLIANCE

Fair Share for Walking & Biking:

Tell the next Illinois Governor and General Assembly to invest $50 million in a new, dedicated Bike Walk Fund.

Each year people throughout Illinois are discovering walking and biking as options for every day transportation, unleashing health, environmental, equitable and economic benefits in communities across the state.

Despite this growth, the Illinois Department of Transportation (IDOT) invests very few state dollars on infrastructure projects to improve conditions for walking and biking. Meanwhile, vast amounts of IDOT funds pour into road projects that benefit drivers and often lead to more congestion and pollution.

We call upon the next Illinois Governor and General Assembly to commit to spending a fair share of state transportation dollars for a new, dedicated Bike Walk Fund of $50 million per year, which is only about 1.5% of state spending at IDOT. This is in addition to federal funds that funnel through IDOT for walking and biking.

Please sign your name below to join our call to action. We'll keep you posted on this and other advocacy efforts that benefit people who walk and bike to work, to school and to recreate.
